production facility - Intermold Co., Ltd.*

INTER MOLD CO., LTD.

About us

BEST TECHNOLOGY

BEST QUALITY

BEST DELIVERY

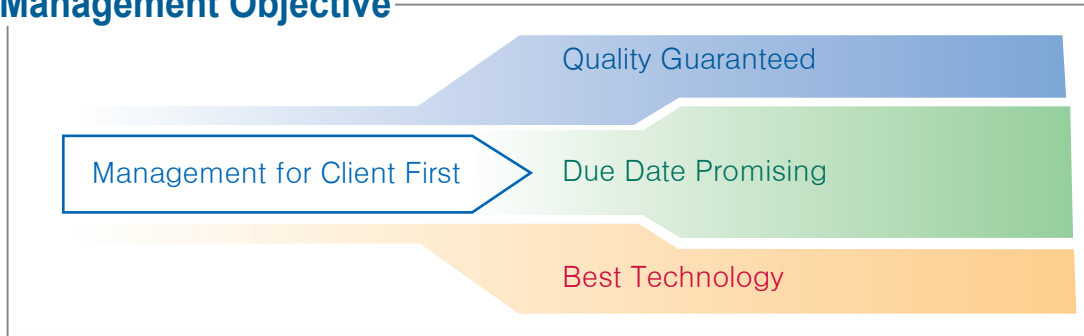

Satisfying the customers with superior quality, zero defect,
and touching after sales service - Intermold Co., Ltd.

Greeting

Pursuing endless innovation through investment in manpower, properties and new technology, and based on the customer-oriented management philosophy, Intermold has become an industry-leading company thanks to the sales and manufacturing activities of the entire staffs focusing on quality, delivery and proactive after sales efforts. In 2006, Intermold will take another leap forward by achieving the management objective of 'Developing New Overseas Customers'.

Management Objective

Company History

- 2000. 12 Company name changed to Intermold Co., Ltd. as a corporation
- 2001. 9 Applied for patent and utility model with a mold for car interior material
- 2002. 4 Acquired QS-9000 certification
- 2002. 5 Started export of molds to Japan and China
- 2005. 7 Expanded the headquarters #2 factory
- 2005. 10 Acquired a patent with a car sound absorption material and mold thereof (Patent No. 524693)
- 2006. 3 Agreement with LITER (GM affiliate) of Germany for supply of molds
- 2006. 5 Started export of molds to Mexico and Slovakia
- 2006. 12 Introduced corporate ERP system

Quality Assurance

All the staffs of Intermold are vested with the quality assurance capability by operating the quality system effectively under the motto of 'Next process is customer', and exert their best effort to improve quality via thorough quality control, thereby enhancing the reliability and recognition of our products.

Patent Certificates

QS-9000

Clean Business Place

M

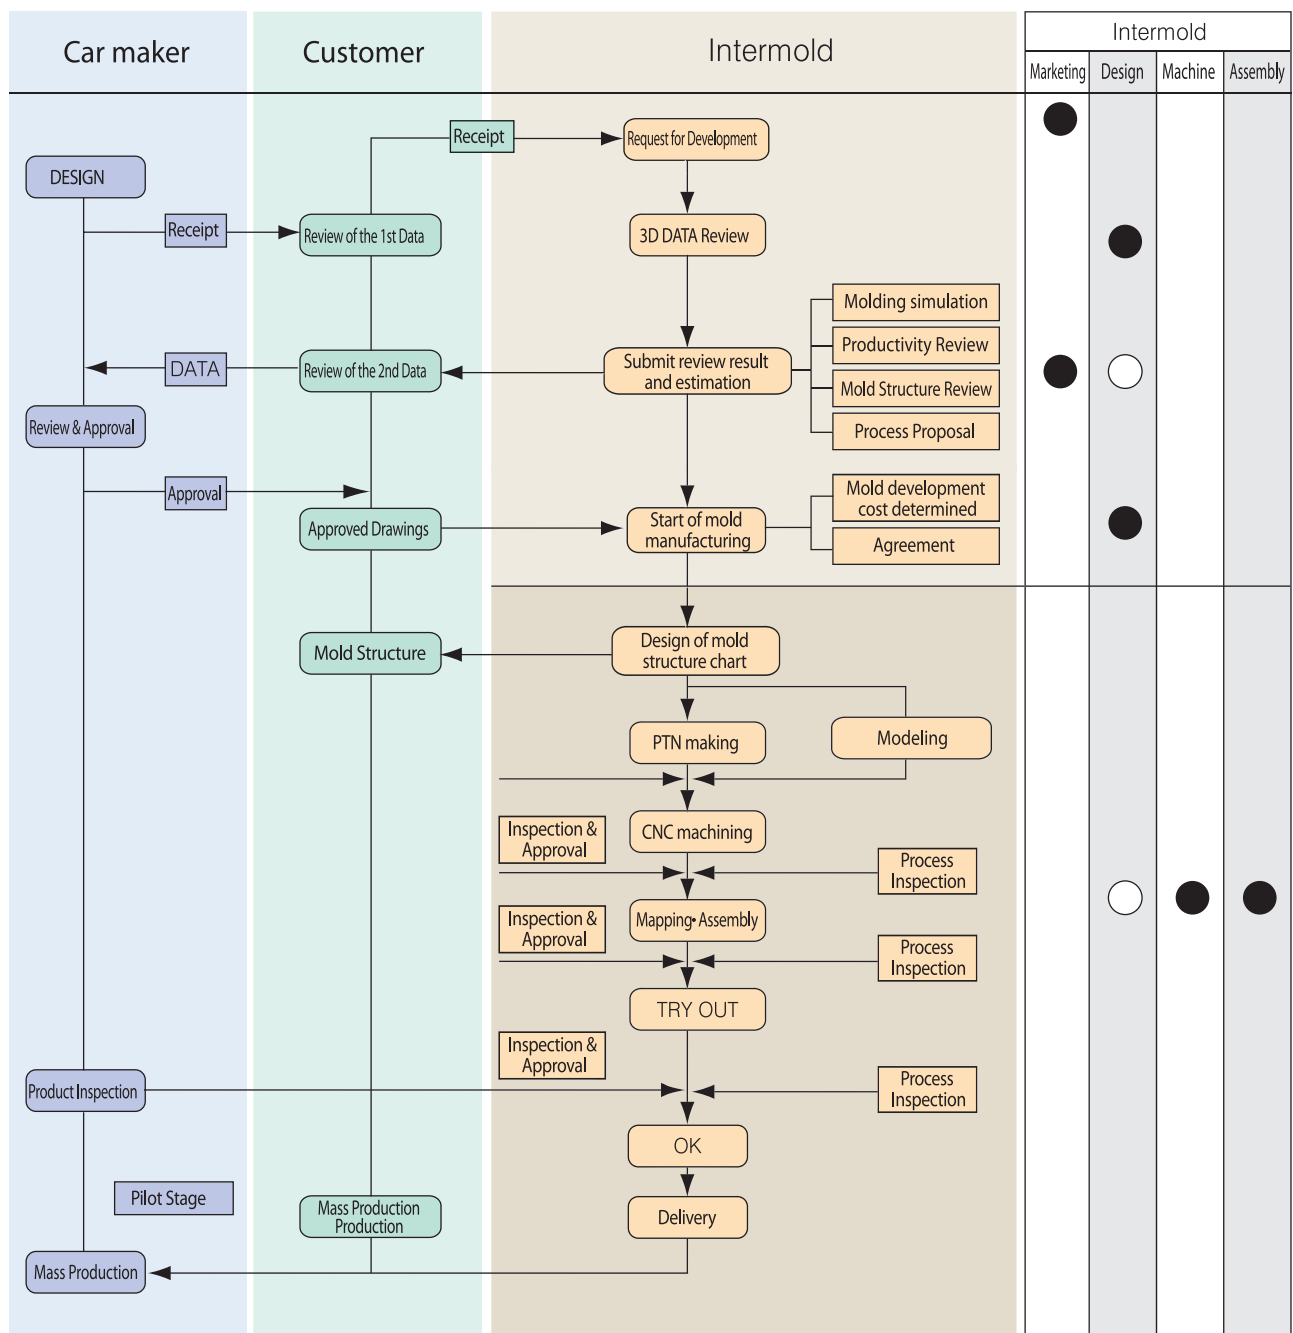

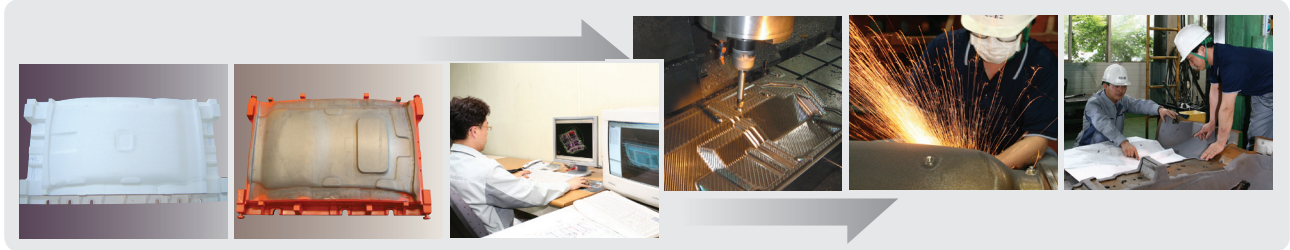

anufacturing Process

"Superior Quality", "Shortest Manufacturing Time"

Intermold will realize high quality, high productivity and the shortest delivery time through design of mold with the advanced CAD/CAM system, precise machining and process management.

Mold Manufacturing Flow

Intermold challenges the Zero Defect through self-inspection at every process from design to manufacturing, and realizes the "Superior Quality" and the "Shortest Manufacturing Time" by removing the inter-process trouble factors to shorten a lead time

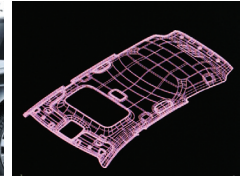

Intermold always places the first priority on customers.

With new idea and spirit, Intermold will satisfy the diverse customer needs by creating new changes all the time, developing new technology via on-going R&D activities.

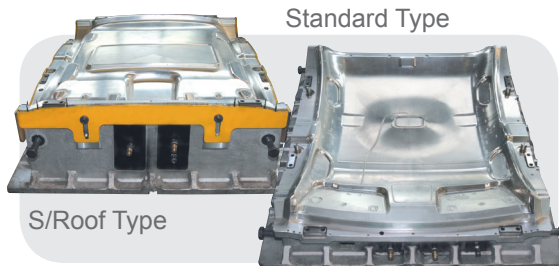

Types of Molds Manufactured

The quality of our products is assured and enhanced via systematic preview, process control and traceability management, based on the quality system of QS9000. With the management principle to provide a proactive after sales service, Intermold is realizing its dream - Customer Satisfaction.
